### DETAILED ACTION

The following is an examiner's statement of reasons for allowance: as stated in the board decision mailed 12/8/2006, the Board noted on the top of page 5 of its decision, that "[b]y administering the composition to a patient, the claims require that the composition counter act the overproduction of nitric oxide." Since neither Joullie nor any other piece of prior art can be found which satisfies the requirement that the Board has pointed out, the claims as they stand are free of the prior art since nothing in the prior art anticipates nor renders obvious a method of counter acting the overproduction of nitric oxide by administering an S-alkylthiol.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
